Tran Hai Nam

I n t e r n   W e b D e v e l o p e r

As a final-year student with the desire to develop my career. Have an interest in web development and want to grow more in this field. I have accumulated a little experience through school projects on how to develop and deploy a website, and some current web development technologies such as Reactjs, nodejs, docker, MySQL, and MongoDB,... At the same time, I also learn more about soft skills such as teamwork, presentation,... Currently, I want a new environment where I can learn from real projects and develop my skills.
